

# Windows

Modern and bold yet sophisticated and refined, this multi-strand clasp is like a breath of fresh air. Highly polished finish and sleek curves combine with six princess cut crystals you glue-in.

Select from our assortment of Swarovski® crystal or use your own. Buy only what you need or keep several crystal colors and clasps on hand so you can create whenever you're in the mood.

Available in three highly polished nickel-free plated finishes: gold, rhodium and ruthenium.

## Ideas to inspire...

Combine colors to create a stunning focal piece

Exotic and elegant ruthenium finish with crystal.

Clasp style:	Windows	Size approx.	
Skill level:	easy	• Exterior: 27x21x12mm	
Time approx:	10 minutes	• Opening: 16x7mm	
Crystals to glue:	6	Nickel-free plated finishes:	
		• rhodium	
		• gold	
		• ruthenium	
Crystals needed (foil, pointback):			
QTY	SIZE	SHAPE	SWAROVSKI® STYLE #
6	5mm	square	4400

### Tools needed:

- jewelers tweezers (see helpful hints below)
- 2-part all purpose 5-minute epoxy, clear drying

### How to:

- Mix glue per instructions. *Before you glue, separate clasp to avoid glue dripping on lever.* Apply glue to recessed bezel on clasp (not on crystal).
- Set in crystal and adjust to make sure crystal is level.

### Helpful hints:

- Use museum putty to hold clasp in place.
- Instead of tweezers, use a toothpick with a tiny bit of museum putty or natural bee's wax rolled on the tip. It will stick to the crystal so you can position it and releases easily.
- If you get glue on the crystals or clasp, dampen (squeeze out all excess) a Q-tip in isopropyl alcohol to remove. This only works if the glue has not set.
